

# Individual Weekly Report

Name: Shreyas Kumar

Team: Good AIM

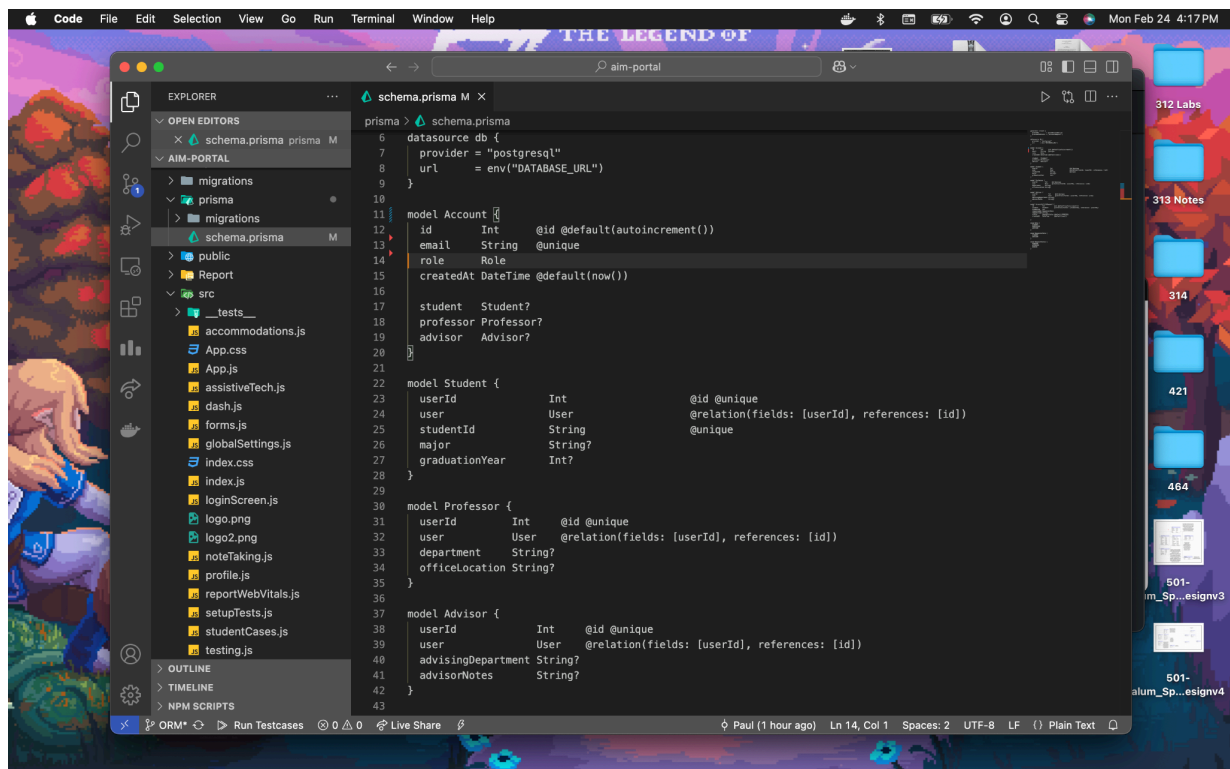

Date: 2/24/25

## Current Status

1. What did you **personally** work on this past week?

Task	Status	Time Spent
I personally worked on remaking the database using the ORM Prisma	Ongoing	1 hour
I also worked on finding issues in how we currently log the current user's session, the OAuth only allows tamu emails and we created custom emails (outside tamu) that we use for example views	Ongoing talks with team about issues	2 hours
Started creating the Professor dashboard view	Ongoing	1 hour

Include **screenshots/graphics** to illustrate what you did this past week:

2. What problems did you run into? What is your plan for them?

We've run into a handful of issues so far. A couple of these issues had to do with our database but we're already remaking our database with our ORM, Prisma. Additionally, there have been some issues in how we formatted our file structure/code structure. We currently are conditionally rendering all views in one dashboard file instead of making individual files for different views so we're currently changing that too. Also, some major issues have come up with trying to access different views with OAuth since we can't access fake emails. We've made our own fake emails to be test users and are currently working on putting them into the database.

3. What is the current overall project status from your perspective?

The current overall project status from my perspective is that we've found a lot of early roadblocks and are currently working on fixing these issues. So dealing with these issues early will help us in the long term and get us closer to a finished product.

4. How is your team functioning from your perspective?

Our team is functioning well, we're finding issues and need to communicate how we want to structure the project with each other better.

5. What new ideas did you have or skills did you develop this week?

Some new ideas and skills I learned this week is that I learned how to use Prisma, the ORM we are currently working on and also got a better understanding of how the OAuth is working.

6. Who was your most awesome team member this week and why?

Our most awesome team member this week was probably Diego because he made a great forms module that has basically full functionality.

### Plans for Next Week

What are you going to work on this next week?

This next week I am going to work on uploading the prisma schemas and have our test emails uploaded to the database so we can access different views with a profile that is uploaded in the database.
