

Individual Weekly Report

Name: Aviral Agarwal

Team: Good AIM

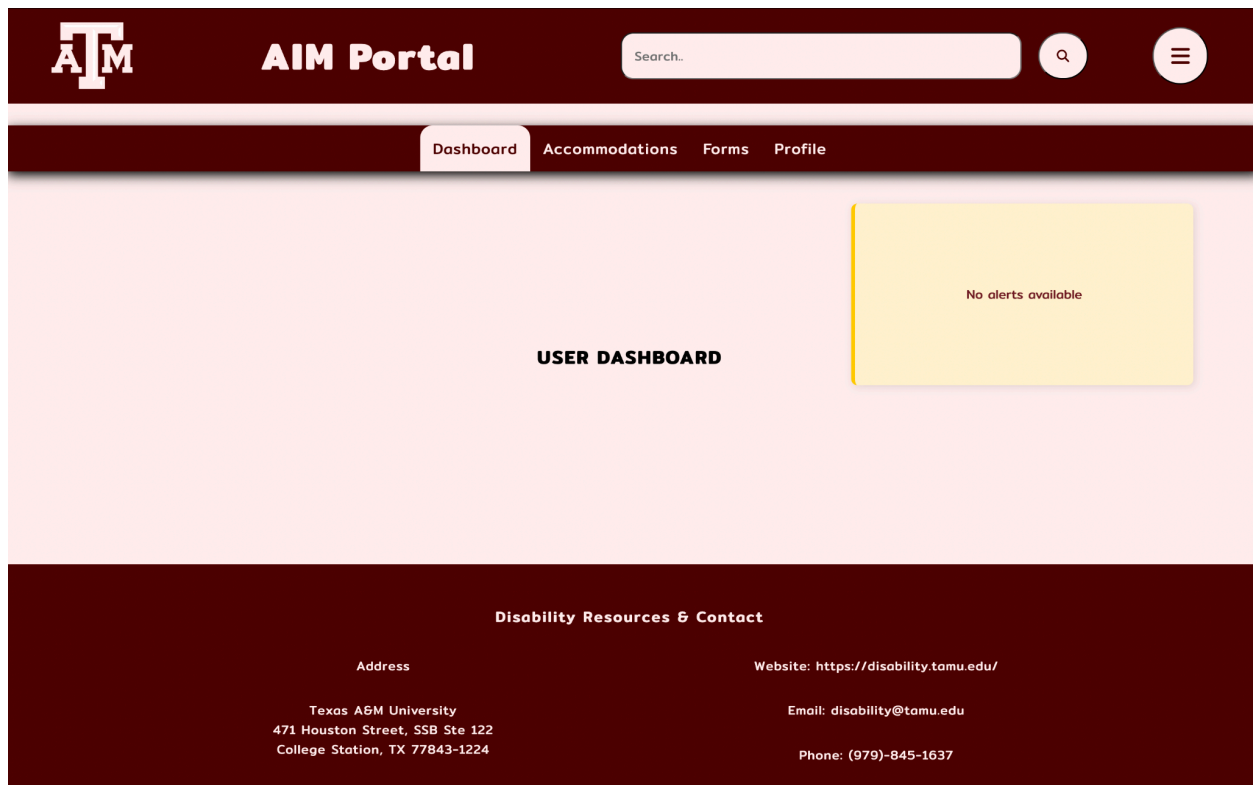

Date: 2/24/25

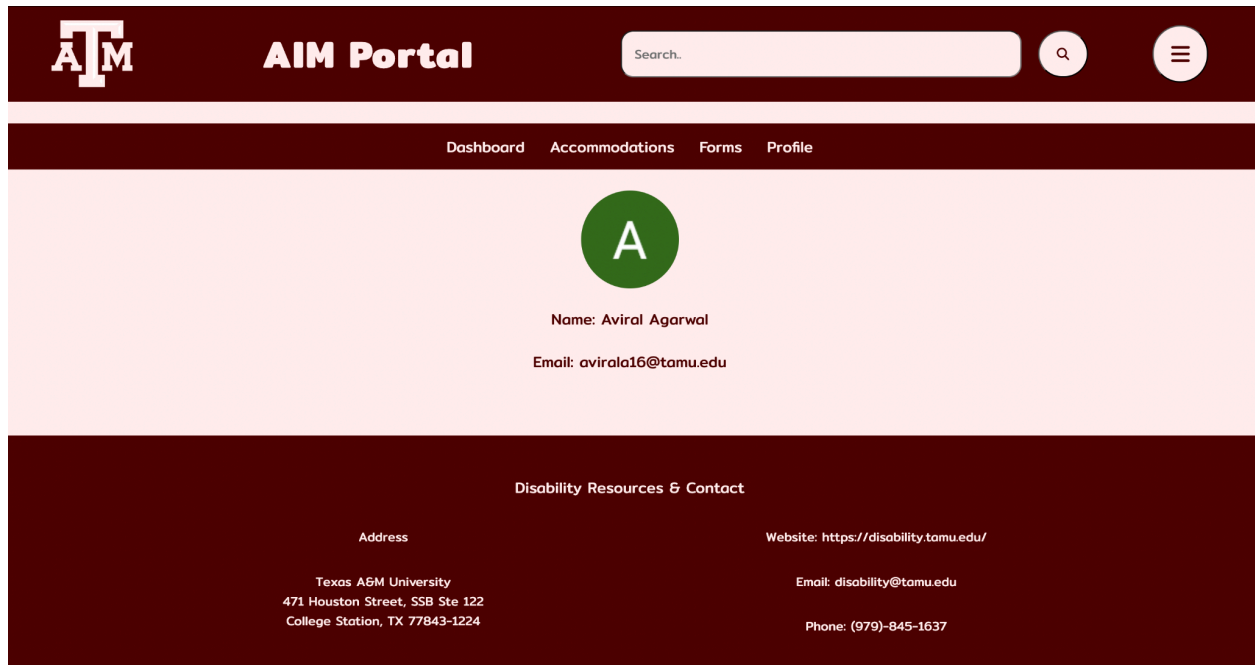

Current Status

1. What did you **personally** work on this past week?

Task	Status	Time Spent
User Profile Skeleton	DONE	1 hour
User Dashboard Skeleton	DONE	30 minutes
Student Dashboard Skeleton	DONE	10 minutes

Include **screenshots/graphics** to illustrate what you did this past week:

2. What problems did you run into? What is your plan for them?

The way we get the current user (logged-in user) caused some trouble but we have a good idea about how to do it now. We will be grabbing the user's email from the OAuth callback and use that as the key.

3. What is the current overall project status from your perspective?

The project is moving along well even though we have some changes to make to already finished parts.

4. How is your team functioning from your perspective?

Everyone is communicating well with each other and always willing to help each other. The team is functioning well.

5. What new ideas did you have or skills did you develop this week?

Using OAuth to extract the logged-in user's email.

6. Who was your most awesome team member this week and why?

Diego did a lot of great work setting up the user forms page which will be very useful moving forward.

Plans for Next Week

What are you going to work on this next week?

I will work on setting up the student profile page and also enhancing the dashboard (adding the User's classes and other information) once our database is fixed.
