

# Individual Weekly Report

Name: Diego Lanz

Team: good AIM

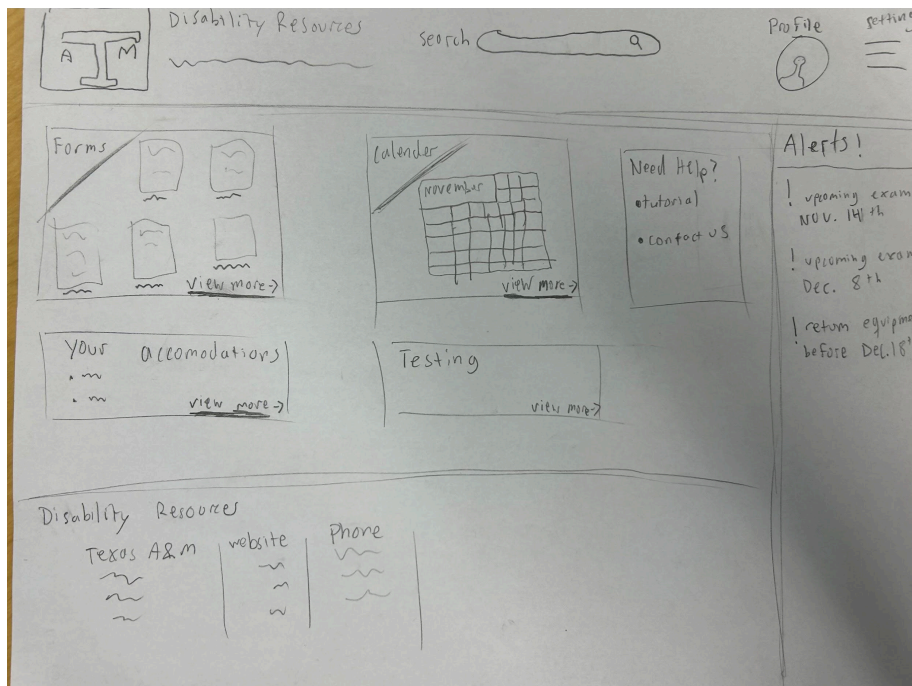

Date: 2/3/2025

## Current Status

1. What did you **personally** work on this past week?

Task	Status	Time Spent
Design exploration comparison of potential solutions.	Completed	1-2 hours
Designed a lo-fi prototype (attached)	Completed	10-15 minutes
User story generation	Completed	1 hour
Attended zoom meeting with Justin (AIM Contact)	Complete	30 minutes

Include **screenshots/graphics** to illustrate what you did this past week:

2. What problems did you run into? What is your plan for them?

**We ran into issues trying to access the existing code base for the current AIM portal. We are planning to create the site from the ground up in this case which would give us much more freedom in terms of initial design and feature creation. We also ran into an issue of trying to balance simplicity, cleanliness, and amount of information for our design, we will continue to develop ideas to make this easier to balance. Finally, I ran into some time management issues this past week so some of my portions of the report were a little delayed, and I will be sure to manage my time better this upcoming week.**

3. What is the current overall project status from your perspective?

**From my perspective, we are currently still in a planning stage, so we are working hard to ensure that we have a fully functioning plan that we can tackle and follow closely. We are also still trying to get familiar with our tech stack, and we are beginning implementation of a simple code base that we can get started with. We will also begin creating a fake dummy database so that we can begin testing our site with fake data as soon as we have a usable MVP.**

4. How is your team functioning from your perspective?

**My team is functioning pretty well, I believe that we all get along well and that we are going to be able to create a great final product. So far everybody has contributed what they need to and there are no glaring issues with team member responsibilities as of now.**

5. What new ideas did you have or skills did you develop this week?

**Before this week, we hadn't really thought of many design ideas and solutions. Now, we have a good idea of how we are going to lay out the screen, and how we are going to make the website accessible by design. We also learned a little bit more about the current system through our meeting with Justin, our AIM contact.**

6. Who was your most awesome team member this week and why?

**I believe Simone Kang was the most awesome. She has taken it into her hands to set up zoom meetings, delegate work, and remind group members of upcoming deadlines. She is definitely crucial to the development of the product and will help us a lot in the long run.**

### **Plans for Next Week**

What are you going to work on this next week?

**This week, I am going to develop an initial code base with my team, and I will analyze more information about disability service sites that already exist. Additionally, I will conduct my individual research document and find my 10 scholarly sources. I will also need to become familiar with my tech stack for the project so that I can successfully contribute to the project in a meaningful way from the start.**
