Individual Weekly Report

Name: Shreyas Kumar
**Team:** good AIM
**Date:** 2/10/25

Current Status

1. What did you **personally** work on this past week?

Task	Status	Time Spent
Group Reference Search	Completed	2 hours
Level 0 and 1 Diagrams	Completed	2 hours
Module Specifications	Completed	1 hour

Include **screenshots/graphics** to illustrate what you did this past week:

Level 1: Backend

2. What problems did you run into? What is your plan for them?

Some problems I encountered was that our planning for the project had a few holes inside of it. There were aspects of the assignment that I needed to know for the level diagrams and module specifications but these aspects we did not have a definitive answer for.

3. What is the current overall project status from your perspective?

Overall, our project hasn't begun yet but our first sprint is starting now. We plan on making the skeleton for our site this week and adding functionality for the next week.

4. How is your team functioning from your perspective?

Our team is functioning well so far. We enjoy working together and are able to bounce ideas off each other. Hopefully this chemistry continues even after we start working on the project.

5. What new ideas did you have or skills did you develop this week?

Some new ideas we had for this week was finalizing the skeleton of our application and understanding what exactly we want. I learned a lot about neon as a database because I have never worked with it before so that would also be a skill I developed this week.

6. Who was your most awesome team member this week and why?

My most awesome team member this week would be Paul because we worked together on the functional design aspect of the report this week.

Plans for Next Week

What are you going to work on this next week?

Software development artifacts report, individual deep dive of resources, populating the DB with dummy data, and creating the professor view dashboard and and profile.
